

**A perfect
mix of**
quality & flexibility

High Speed Pan Mixer from Pemat

MIX.ING.

Mixing Technology made in Germany

MIX.ING. stands for our philosophy of reasoned and perfected mixing technology processes. This is a philosophy we live by and involve in every detail of our products.

We produce High Speed Pan Mixer for:

- Ready mixed concrete
- Mortar
- Generating plant
- Chemical

Why Pemat? **Know-how, quality and customer focus**

With over four decades of experience in the development and manufacture of mixing technology products, today we are innovative leader in the areas of mixers, skip hoists and complete mixing plants. Our know-how enables us to help our clients optimise their processes, ensure quality, save raw materials and decide on the optimum mixture for every demand. Our products are developed and produced exclusively in Germany, in a resourceful way and sold all over the world.

Service from Pemat. **24 hours a day – seven days a week**

We ensure the special quality and long-term availability of our products with a demanding quality control system. With our highly-qualified sales and support team we support our clients both before and after purchase with words and deeds – 24 hours a day – seven days a week.

- Lateral inspection door
- Mixing process inspection flap
- Discharge protection

Discharge

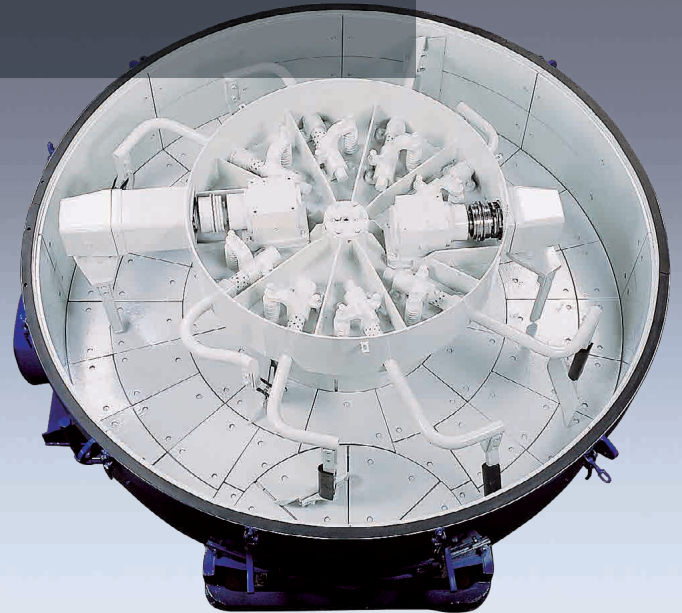

- Hydraulically operated
- Fast clean discharge
- Up to 4 discharge outlets possible
- Part opening possible
- Discharge protection for health and safety
- Individual pivoting or telescopic discharge chutes with wear lining in steel, polyurethane or rubber

The models

High Speed Pan Mixer from Pemat

PM

PMR

The PM

The basic High Speed Pan Mixer

Even our basic version sets standards in quality and reliability. The PM High Speed Pan Mixer has proven itself over decades as a powerful mixer in a wide variety of applications.

Its advantages:

- Sturdy
- Long lifetime
- Reliable
- Easy Maintenance

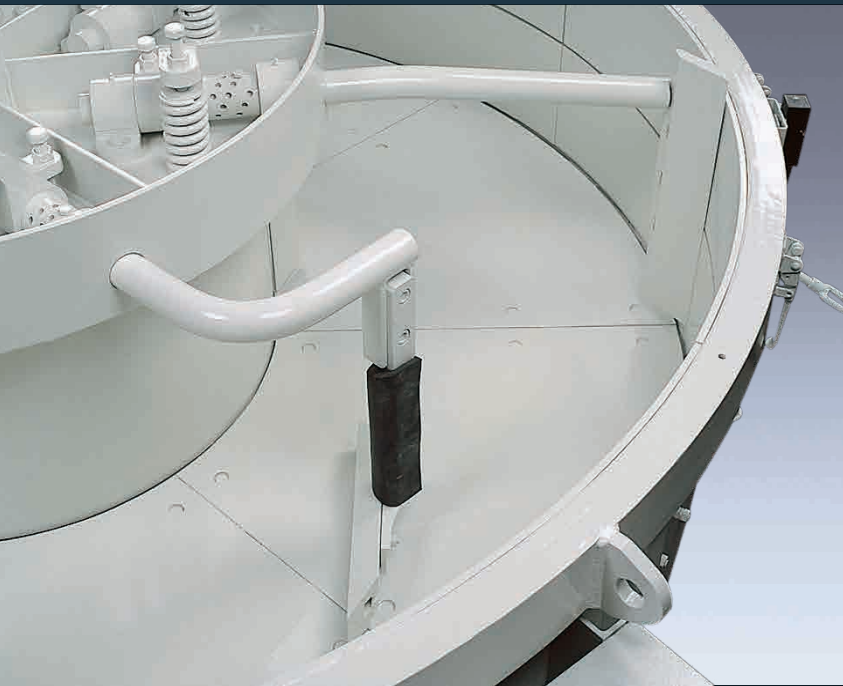

The PMR

The High Speed Pan Mixer with whirler

Developed and built to meet highest demands of homogeneity of the mixture. Due to the special design of the unique main drive no extra motors are required to power the intensive whirlers.

Its advantages:

- Unique technology
- High quality equipment
- Fast homogenization

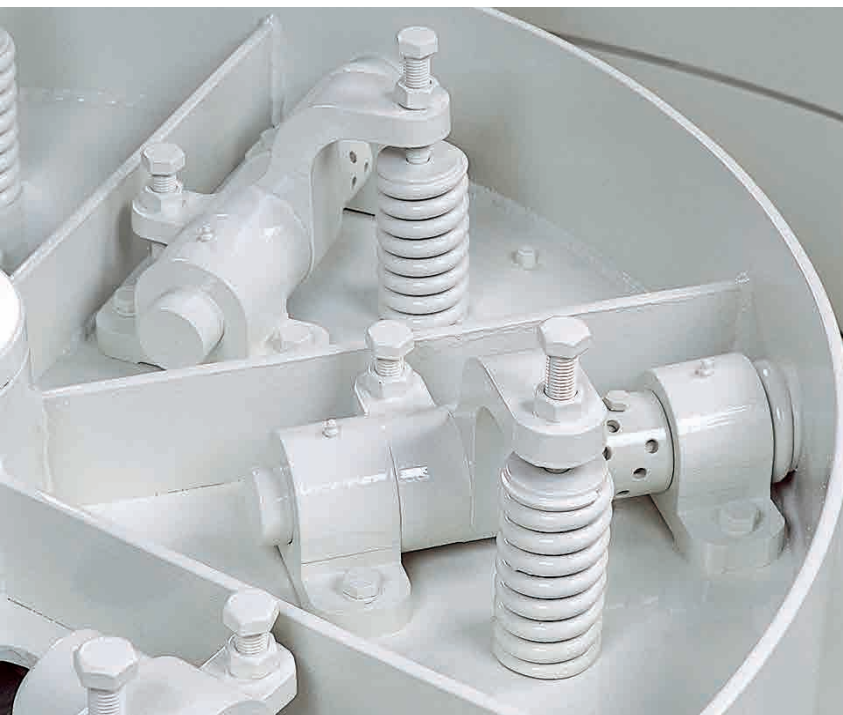

Mixing tool

Skip Hoists

The Mixing tool

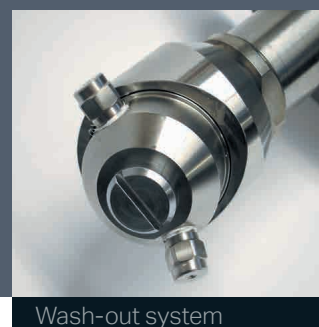

Two part mixing arms and outer scraper arm are spring loaded to prevent damage. This allows them to be adjusted horizontally and vertically.

Accessories

All Pemat High Speed Pan Mixers can be equipped with the following accessories:

- Skip hoists
- Steam injection
- High pressure wash-out system
- Moisture metering
- Camera attachment
- Cooling / drying
